

PRODUCT DESCRIPTION

- MILK MAKER HEIFER GROWER is scientifically prepared to supplement nutrient requirements of growing replacement heifers.
- To be fed from the age of 32 weeks to 1 month prior to calving. Assists the growing heifer to reach the optimal weight at the ideal joining age and the ideal weight at calving. It is of vital importance that the heifers maintain a steady rate of growth by receiving the correct nutritional requirements to enable them to be a productive partner in your future dairying business.

COMPOSITION

- Base grain is as depicted by seasonal availability and therefore proportions may vary.
- Barley, maize, sorghum, wheat, bran and pollard, cottonseed meal, limestone, sodium bentonite, dicalcium phosphate, salt, Rumensin™, Ruminant Vitamin and Mineral pak.

DIRECTIONS FOR USE

- The Milk Maker Heifer Grower supplement plays a role, particularly in circumstances of reduced availability and quality of pasture in maintaining the growth rate of the heifer so that it meets its target weights at the correct ages.
- The following tables are based on ryegrass/legume pastures, therefore where pasture types differ, the feeding rate should be altered to suit.

Where pasture availability is restricted and quality is poor, supplementation with additional forage is necessary, to ensure proper rumen fermentation.

TECHNICAL RELEVANCE

- Scientific studies have produced evidence of enhanced production and maximisation of genetic potential by way of supplementary feeding with correct nutritional supplements to growing heifers.

VETERINARY CHEMICALS

This feed contains the following veterinary chemical-

- Rumensin™ as monensin sodium at the rate of 25 milligrams per kilogram.

MEDICINAL CLAIM

- Monensin sodium is added to this feed to improve feed efficiency of rumen digestion and growth rates.

SPECIAL FEATURES

- Supplies essential nutrients for growth and performance.
- #### QUALITY PRODUCT
- Manufactured to strict quality control standards.
- #### PRECISE FORMULATION AND MIXING
- Formulated in accordance with current research of maximising heifer performance and mixed from a variety of quality raw materials.

WITHHOLDING PERIOD
